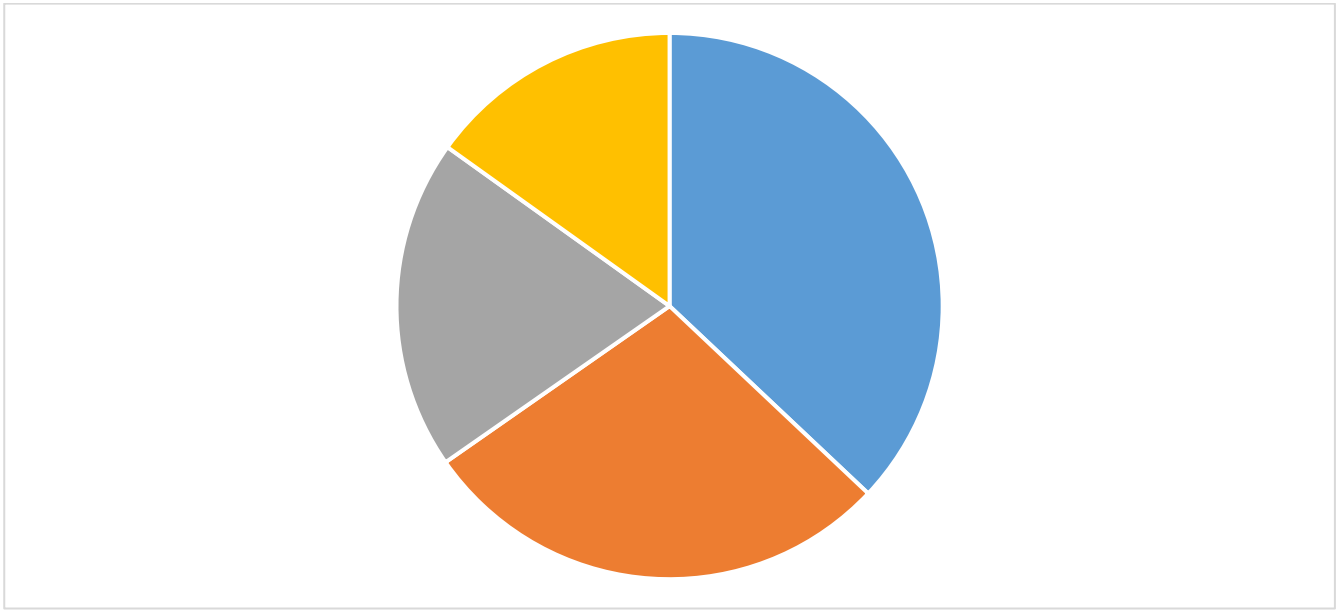
12.2 Manufacturing Costs Percentage of Naked Eye 3D LED Display Screens

Figure 79. Manufacturing Cost Structure Analysis of Naked Eye 3D LED Display Screens in 2021



Source: Expert Interviews, Secondary Sources and Global Info Research, 2022

Manufacturing costs, for the most part, are sensitive to changes in production volume. Total manufacturing expenses increase as production increases.

Manufacturing costs fall into three broad categories of expenses: materials, labor, and overhead. All are direct costs. That is, the salary of the company accountant or the accountant's office supplies are not included, but the salary and supplies of the foreman are.

The raw materials include direct material, like raw materials, accessory material and packing materials.

Direct Labor Costs includes the cost in the production line, like wages and welfare.

Manufacturing expenses includes a lot of items, like the depreciation costs for the equipment, plants, staff dormitories and storehouses, etc. Also include the energy costs like water and electricity, industrial gas and steam, as well as expenses like Safety and Health, low-value consumables and spare parts, sporadic materials.

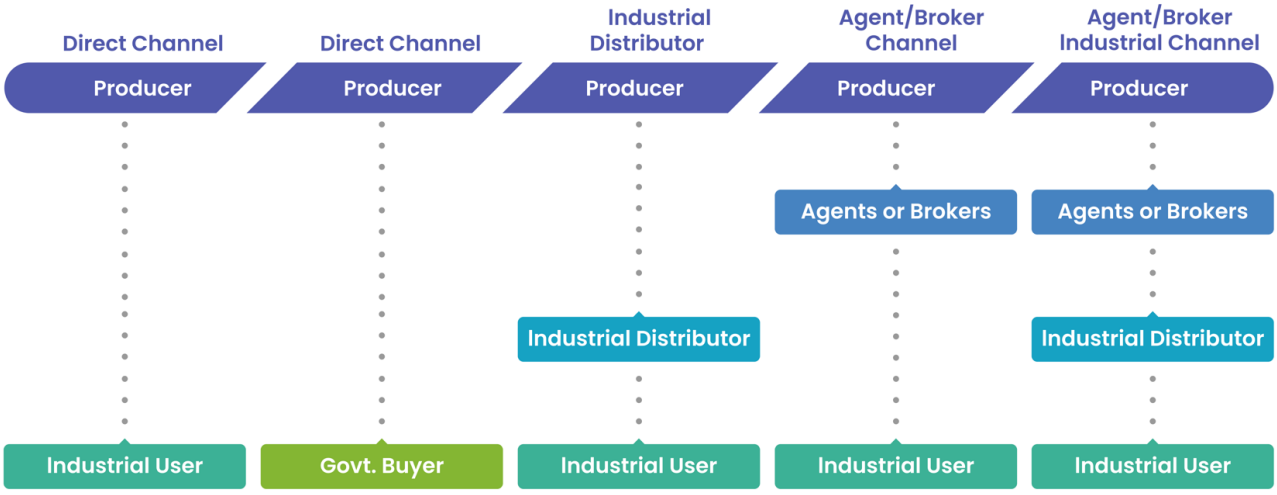
13 Sales Channel, Distributors, Traders and Dealers

13.1 Sales Channel

There are two types of distribution channels: direct and indirect. As the names would imply, direct distribution is a direct sale between the manufacturer and the consumer, and indirect distribution is when a manufacturer utilizes a wholesaler or retailer to sell their products. There are pros and cons associated with either method and deciding the right choice for a business heavily depends on the trends and preferences of the consumers.

Figure 82. Sales Channel: Direct Channel vs Indirect Channel



Source: Secondary Sources and Global Info Research, 2022

13.1.1 Direct Channel

A marketing channel that does not use intermediaries to distribute the product. Direct sales are selling directly to consumers away from a static commercial or physical location. In today's modern world of direct selling, deals can be closed via personal arrangements, in-person demos, and of course online direct sales.

A direct sales channel requires building and managing a sales team. The sales team needs to be close to your target markets so if you plan to sell in multiple markets you will likely need local sales teams which may add an additional cost and management overhead.

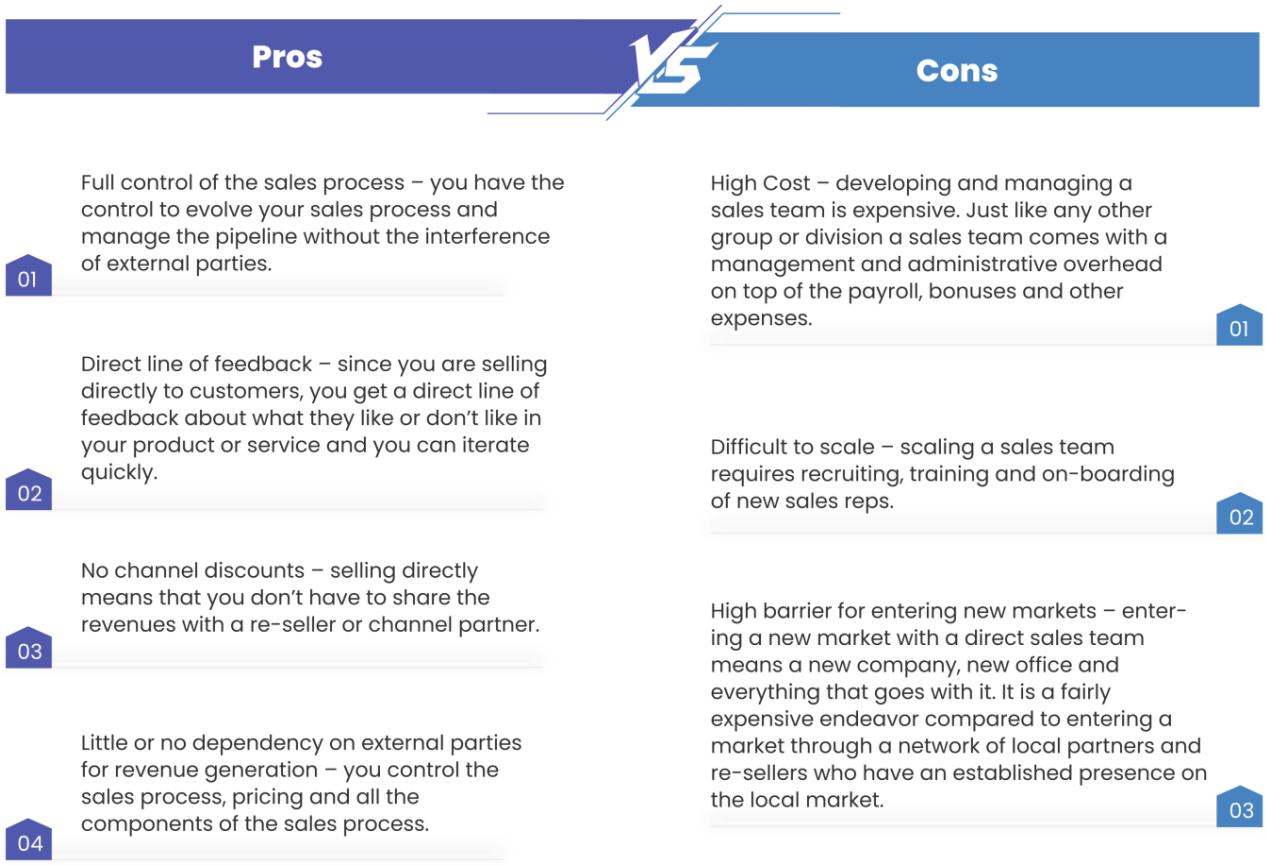
Figure 83. Direct Channel Pros & Cons



Source: Secondary Sources and Global Info Research, 2022

13.1.2 Indirect Channel

A marketing channel where intermediaries are used to helping distribute the product. Re-sellers, distributors, value-added providers and other types of channel partners can provide a wide reach for your business and get your product or service in front of many prospective buyers.

It is also a very cost-effective way to enter new markets as it spares you the costs of maintaining a local operation.
